

Leave all plants and animals in their own environment. Do not take things from their home.

Feed birds and other animals in the winter months when food is hard to find. Only give them good food (seeds), not junk food.

Plant flowers and other plants that attract birds and butterflies. Then care for those plants. Do not use pesticides and other things that can hurt the animals.

Keep the school and school yard clean so that everyone is safer. Do not leave garbage on the ground that can harm animals.

Do not be wasteful of the natural resources (gasoline, wood) so that we can use less. This will help reduce pollution.

Respect the lives of all living things; plant, animals and other humans. Do not bully people, do not kill plants, and do not harm animals no matter how small.
