# All about Birds

Birds have \_\_\_\_\_ wings \_\_\_\_\_ and most birds can fly. The  
\_\_\_\_\_ ostrich \_\_\_\_\_ however, does not fly. Birds are the only  
animals with \_\_\_\_\_ feathers \_\_\_\_\_. They are \_\_\_\_\_ warm \_\_\_\_\_-blooded  
animals and some live in water and some live on the  
\_\_\_\_\_ ground \_\_\_\_\_. Birds will eat insects, \_\_\_\_\_ fish \_\_\_\_\_, meat,  
\_\_\_\_\_ berries \_\_\_\_\_ and sap from \_\_\_\_\_ trees \_\_\_\_\_. Birds have  
\_\_\_\_\_ bills \_\_\_\_\_ to help them find and eat food. Thick, strong  
bills are used to \_\_\_\_\_ crack \_\_\_\_\_ seeds and sharp bills are  
used for making \_\_\_\_\_ holes \_\_\_\_\_. Spear-shaped bills are used  
for \_\_\_\_\_ catching \_\_\_\_\_ fish. Birds make \_\_\_\_\_ nests \_\_\_\_\_  
and the young are \_\_\_\_\_ hatched \_\_\_\_\_ from eggs. Some birds  
can't find enough food in the fall and winter months, so they  
\_\_\_\_\_ migrate \_\_\_\_\_ south.
