Light and Sound Quiz

1. Choose one of the experiments we did dealing with light and answer the following questions:

a. Briefly describe what you did for the experiment.

b. What property of light did this experiment demonstrate?

c. How did this experiment demonstrate this property of light?

d. Use the space below to provide any additional information you would like to discuss about the experiment or the specific property of light. (If you do not have any additional information, or have space left, list other properties of light.)

2. Choose one of the experiments we did dealing with **sound** and answer the following questions:

a. Briefly describe what you did for the experiment.

b. What property of sound did this experiment demonstrate?

c. How did this experiment demonstrate this property of sound?

d. Use the space below to provide any additional information you would like to discuss about the experiment or the specific property of sound. (If you do not have any additional information, or have space left, list other properties of sound.)
