

Review of Definitions

Features of an Ecosystem

- Constant environment
- Same general level of rain/sunlight throughout
- Clear physical or environmental boundary (i.e., the edge of a pond is the edge of the pond ecosystem)

Four Main Abiotic Factors

- Air
- Sun
- Water
- Soil

Interactions Between Biotic and Abiotic

Abiotic Factor	What does it provide?
Air	O ₂ (oxygen), CO ₂ (Carbon Dioxide)
Sun	Energy, Light, Warmth
Water	Growth, Transportation of Food
Soil	Nutrients
