

Organize yourselves into 8 <b><u>EVEN</u></b> groups. Memorize your group number.			
Group 1:	Group 2:	Group 3:	Group 4:
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Group 5:	Group 6:	Group 7:	Group 8:
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

# Environmental Protection

Today you will sit down with your group, and one other group. The two groups will be given a topic to discuss. You will discuss that topic for approximately 7 minutes, at which time a timer will sound. When the timer sounds you will leave the paper with the topic on the desk, and rotate to your new topic. You will then discuss the new topic with the new group. After four rotations we will hold a class conversation about what you have discussed.

Round	Groups			
	Topic #1	Topic #2	Topic #3	Topic #4
1	1 & 2	3 & 4	5 & 6	7 & 8
2	4 & 5	1 & 7	2 & 8	3 & 6
3	3 & 8	2 & 6	4 & 7	1 & 5
4	6 & 7	5 & 8	1 & 3	2 & 4

# Cost of Environmental Protection

Please return the sheets to me.

Now that you have had a chance to discuss all four of these topics, let's look at them one at a time as a large group. What are your thoughts on...

Controlling Water Flow

Widening Highways

Integrated Pest Management

Emphasis on Recycling

As you can see, humans have had a very negative impact on the earth and the environment. Luckily, there are several groups who are doing their best to help. However, as we have discussed, sometimes trying to do good can actually cause more harm.

This doesn't mean we shouldn't try, it just shows the importance of fully thinking through our actions.
