

# Grade 7 Science

## Unit 2: Ecosystems

## Ecosystems Unit Test

- Please sit at the end of one of the desks.
- Place all of your belongings, not needed for the test, on the back counter, not in the desks.
- You are expected to **stay in your seat**, raising your hand if you need me.
- You are required to **stay silent** for the entire period, speaking only to me, and only in a whisper.
- While writing the test, if you do not know a question, skip it and move on. Draw a star beside the question so that you remember to come back to it, but be sure to get to it today.
- You will have three periods, so you should get through at least one page, front and back, per day.
- When you finish your test, **check the "Test Complete" box** at the top of the first page.
- When complete place the test in the "Done" pile, then return silently to your seat and work on something else.

# Ecosystems Unit Test

Please be sure that your binder has been handed in to the appropriate pile, and that your name is on it.

When you are done your test, and have checked it off as done and placed it in the done pile, you are to work silently at your table until everyone is done.

We will start our Pure Substances and Mixtures unit next class.
