

# Grade 7 Science

## Unit 4: Structures

## Types of Structures

Get a computer.

Go to the new unit on our grade 7 science webpage.

Start working through the task, "Types of Structures." The [instruction sheet](#) found online will explain everything. You need to read BEFORE you do the quiz.

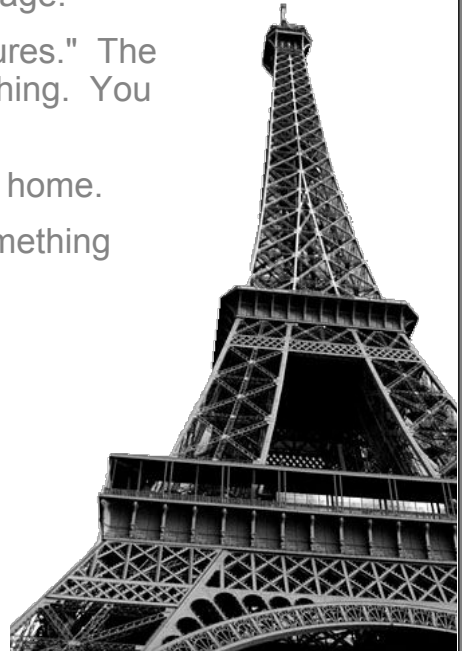

Anything not done in class is to be completed at home.

Be sure to read everything carefully, there is something you need to **submit next class**.

If you finish everything you can, you may work on a title page for this unit. The names of this unit are:

"Form and Function" or "Structural Strength and Stability"

(Yes it has two names, choose one for your title page.)
