

Elephant Toothpaste

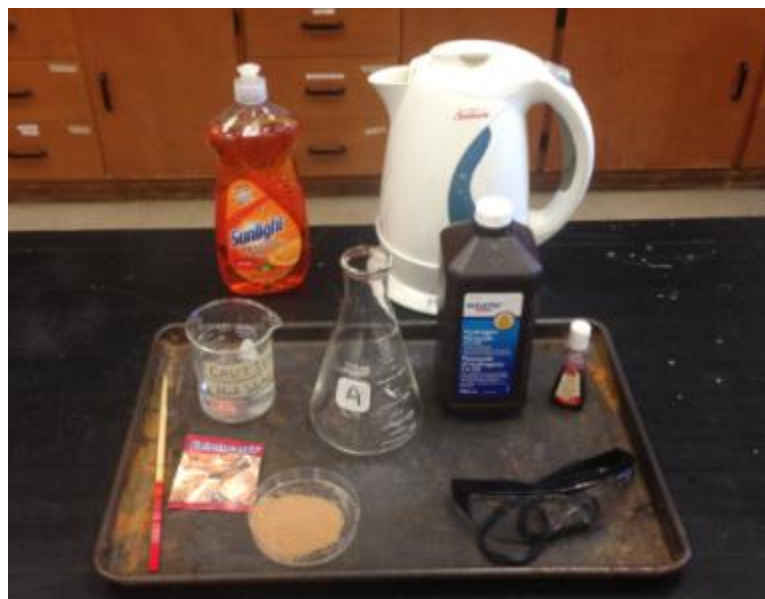

200 ml Hydrogen Peroxide

2 packages of yeast

100 ml water at about 40°

2 big squirts of dish soap

12 drops of food colouring

Before Mixing:

What is yeast used for in baking?

Making it rise

How might it do that?

Produces CO₂

After Mixing:

What happened?

Chemical reaction

Why did we get foam?

CO₂ trapped in soap
