

# GRADE 8 SCIENCE

## UNIT 5: HYDRAULIC SYSTEM DESIGN

## Work Period

Today is your first full period to sit and work with your group. By the end of this period you will have met with me to explain the task for which you are building your "robot." If you do not have an idea by the end of the period, I will be making that decision for you.

Once you have decided on the task, you are then to **brainstorm design ideas** and **begin draft drawings**. [Here](#) are some examples.

Please sign up for a time slot to meet with me. If you already have your task decided, please sign up to meet first.
