

GRADE 8 SCIENCE

UNIT 5: HYDRAULIC SYSTEM DESIGN

Hydraulic System Design

Today you will continue working on your initial concept drawings. When you have them to the point that you feel they communicate how your system will work, you may start gathering your materials to start. As you progress you will find that some of the ideas you have drawn do not work, and you will have to adjust - that is all part of the process.

Also, this period, I will start showing groups how to use the scroll saws. I will train one group at a time.

By next period each group should be ready to start building. Please be sure you have your safety equipment with you, if you are using your own.

Hydraulic System Design

Today is your _____ period for week _____ of your hydraulic system design project.

A this point, you should be working on:

When the timer reaches zero, please clean up any tools or materials you have out. Those who are not building may continue to work.
