

GRADE 8 SCIENCE

UNIT 5: HYDRAULIC SYSTEM DESIGN

Hydraulic System Design

Today's period is for you to build. By now you should have the following complete:

- Robot's task decided
- Initial design concept drawings complete
- Tool training
- Scroll saw training
- 1 week journal entry

After today's period you will also need to complete:

- 1 more journal entry

If you have not started building by today, you are behind, you need to come in at a break to catch up.

Hydraulic System Design

Today is your _____ period for week _____ of your hydraulic system design project.

A this point, you should be working on:

When the timer reaches zero, please clean up any tools or materials you have out. Those who are not building may continue to work.
